

Name: OFFGRID

Logo:

Winter Collection

*Presented by Muhammad bilal
and Ramazan Hussaini*

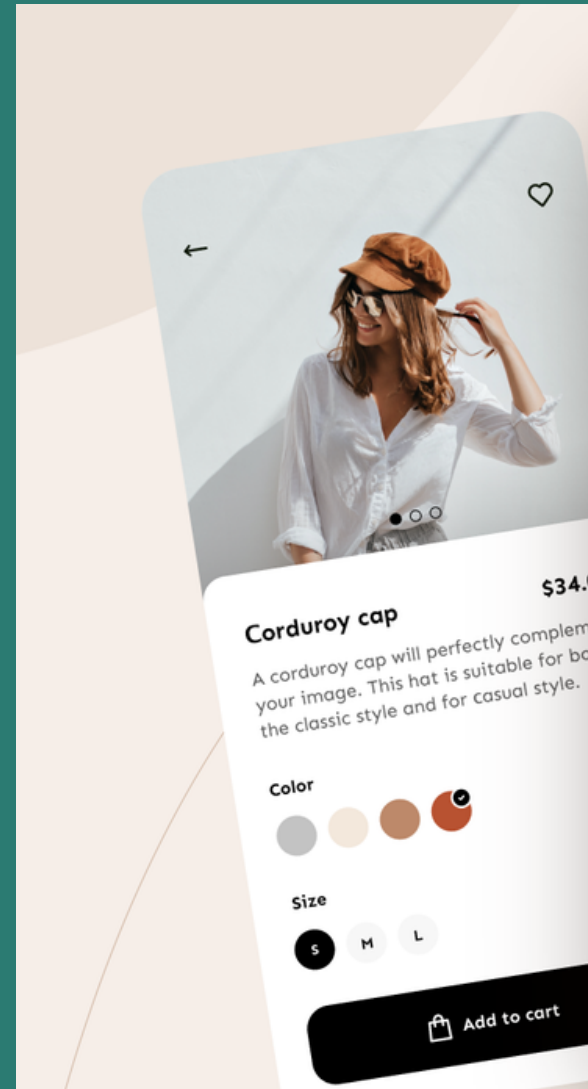

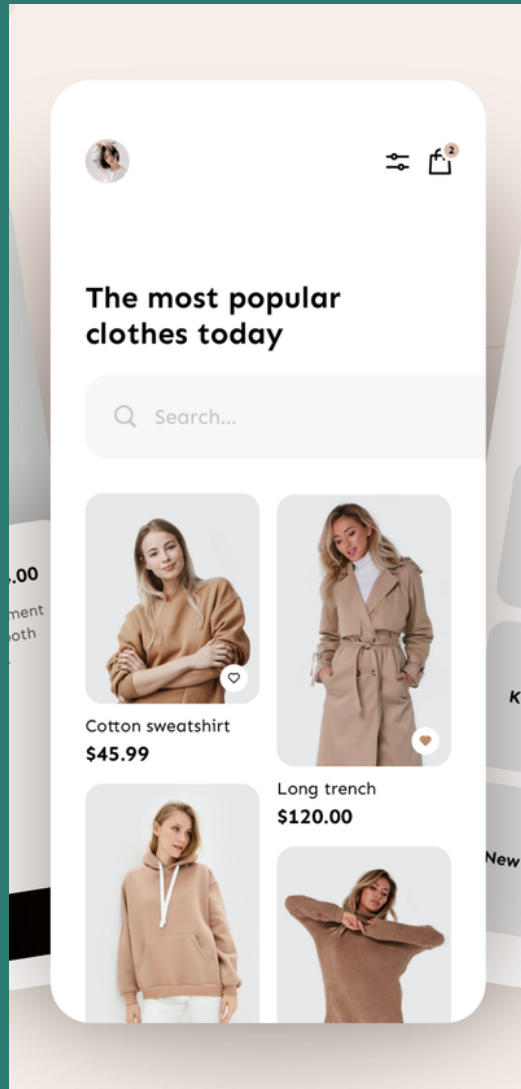

Type:

- An E-commerce shopping website for trendy winter collection
- Frontend and pseudo Backend, if the budget is right.
- mobile-first

working:

- On the main explore page you can see the top trending products which are dynamically rendered using template engine.
- If you select a product you will be directed to another dynamically generated product page, where more details about the product are given
- All the data is stored in a JSON file,
- All pages are responsive across all screen sizes and browsers
- The complete project is rendered using node.js

UI Design:

Languages and Technologies

- html
- css
- Bootstrap
- JavaScript
- node.js
- Express Js
- EJS
- json data
- Mongodb (optional)

4 GPA?

i mean...

Thank You

that will be all
